Como configurar Puertos de Modem Huawei Echolife Hg520c. Como configurar Puertos de Modem Infinitum. Como Entrar a la configuración del router hg520c. never seen anything like this, can you please

help? In my coding I assign the 'phoneLabel' to the value of 'strCountryCode', which is a string, and I can see it in the log, however when I assign it to the input field, it shows a type error. A: What you'll want to do is access the element directly. First you'll have to get your countryCode variable into the global scope. i.e. in the controller:

```
$scope.thePhoneNumber =  
i.phoneNumber;  
$scope.theCountryCode =  
i.countryCode;
```

If you just had two input elements in that part of the code, this would work:
